Welcome

You already know how PayJustNow works and how to explain the payment options to a customer. Now let's look at what happens at the Point of Sale, where the order of each step matters.

What you will learn:
By the end of this course, you will be able to apply the payment rules, check for excluded products, choose the right refund action and respond when a refund does not process.

Sale Journey

A customer is ready to pay with PayJustNow. Follow the visual journey from loading the customer and selecting PayJustNow to the customer scanning the QR code, confirming the payment and completing the transaction. As you go, look out for the order of the tenders, the customer approval and the final confirmation.

Before you process a PayJustNow sale, keep these four rules in mind.

- Add all other tenders first. PayJustNow comes last.
- The customer approves the payment in the app.
- You can cancel before approval. After approval, process a return or a new sale.
- Employees may use PayJustNow with their staff discount.

Knowledge Check

A customer is paying R200 with a gift card and wants to use PayJustNow for the balance. After scanning the QR code, but before approving the payment, the customer asks to add another item. What is the best action?

Feedback:
The customer has not approved the payment yet, so the PayJustNow tender can still be cancelled. Rebuild the sale so the gift card is applied first and PayJustNow covers the correct remaining balance.

A. Ask the customer to approve the current amount, then add the item to the same transaction

B. Cancel the PayJustNow tender, add the item, apply the gift card again and then select PayJustNow for the new balance

C. Add the item while the approval is open and keep the original PayJustNow amount

D. Complete the sale, then refund the gift card so the extra item can be added

Question **1** of **1**

Exclusions

Not everything in the basket can be paid for with PayJustNow. TFG gift cards, airtime, data, 1Voucher and other Value-Added Services are excluded.

Tell the customer before payment and use another tender for the excluded items. Not everything in the basket can be paid for with PayJustNow. TFG gift cards, airtime, data, 1Voucher and other Value-Added Services are excluded.

Tell the customer before payment and use another tender for the excluded items.

Your Payment

Total Purchase R4,000.00

Choose Your Payment Plan:

● **R526.00** for 12 Payments
28.75% interest, plus fees
Spend Up To: R15,000.00

○ R1,333.00 for 3 Payments

Knowledge Check

A customer wants to buy a jacket, airtime and a TFG gift card. The customer also wants to pay part by debit card and use PayJustNow for the balance. What is the best action?

Feedback:
The excluded products need another tender. For eligible merchandise, apply the debit-card payment first and PayJustNow last.

A. Apply the debit card first, then use PayJustNow for everything left in the basket

B. Explain that the airtime and gift card need another tender, apply the debit-card payment, then use PayJustNow last for the eligible merchandise

C. Use PayJustNow for the jacket and gift card, then use the debit card for the airtime

D. Process the jacket separately on PayJustNow before dealing with the other tenders

Question **1** of **2**

Choose the refund journey

YES:

Refund the full eligible return amount through PayJustNowStores.

NO:

Refund only the PayJustNow portion through PayJustNowStores. Return the remaining amount to the other original tender.

Three refund checks

1.
PayJustNow money goes back through PayJustNow

2.
A split refund is limited to the PayJustNow portion. The system may show the limit in cents

3.
Check the return reason and quantity before you tap Apply

Knowledge Check

A customer paid part of the original purchase by card and part through PayJustNow. During the return, the PayJustNow refund limit shown on screen is lower than the total refund amount. What should you do?

Feedback:
First compare the amount entered with the PayJustNow limit. The limit may be shown in cents. If the tender and amount are correct but the refund still fails, log a call on Synergy or contact Tech Support on 021 937 4499.

A. Refund the full amount through PayJustNow because PayJustNow was used in the original sale

B. Refund only up to the PayJustNow limit through PayJustNow, then return the remaining amount to the other original tender

C. Refund the full amount to the card because the PayJustNow limit is too low

D. Change the return reason to increase the PayJustNow limit

Question **1** of **2**

Select a question to view the answer.

- I am not getting a QR code.
- My OTP has not arrived.
- How can I use money in my PayJustNow wallet?

Customer Questions

Customer

Why has my saved card disappeared?

Store Employee

The bank may have blocked PayJustNow from using the card after a failed debit attempt. Check that the card is active, enabled for online purchases and has enough funds. If the problem continues, the customer can use instant EFT or another card.

Well Done!

You can now apply the PayJustNow rules on oneX and choose the correct refund action.

Remember: other tenders first, PayJustNow last. Check for excluded products. During a refund, check the original transaction, the PayJustNow limit, the return reason and the quantity.
